RULE—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet, for each plant or hill, which, divided into the number of square feet in an acre (43,560), will give the number of plants to the acre.

Quality Seeds

THE essential point about seeds is quality; the first is, of course, that they will grow but far more important than the growing is that they will produce a first class crop when planted and not an inferior crop that cannot be used or marketed. It would be better that the seed did not grow than to grow and produce a crop of no value.

Of course, all our seeds are tested for germination but the main point is that our seeds are grown by the best growers; growers who have a long reputation of producing the best seeds obtainable.

This is the point that you as a grower are interested in as it means the difference between success and failure in your crops.

The price of seeds means very little but the quality means all.

Our prices are based on Quality Seeds and you will find them as low as seeds of equal quality can be sold for, if not lower, but we make no effort to compete on price alone with some cheap mail order house but try to give you the best seeds obtainable.

With our many years of experience in the seed business, we believe that we are in a position to offer you seeds that will give you the best results.

All our other merchandise is handled on the same basis, quality always first.

We are always glad to advise you in your selections at any time.

Yours very truly,

D. A. WHITE & SONS

NOTICE

On account of the various market changes in prices, we quote subject to the following statement:

We guarantee that we will give full value for the money sent, whether the price at the time you order be higher or lower, or if the difference is very great, will notify you before shipment.

SEED GRAINS

Write for prices when in the market.

Recleaned Marquis Spring Wheat. The heaviest yielding spring wheat grown in the Northwest. Heads are beardless, chaff smooth and kernel dark amber in color. Very heavy and grades as hard wheat.

Kinney Wheat. An old standard wheat that has been grown for years here and always produces a good crop. May be sown either fall or spring.

White Winter Wheat. This is the favorite variety for this section of the valley especially for the prairie and lower lands. Planted in fall and early winter.

Gray Oats. Sown both fall and early spring and the standard oat for this valley and western Washington and Oregon.

White Oats. Have some very choice seed oats of this well known variety, clean and fine quality.

Spring Rye. Makes a good crop sown in the spring.

Fall Rye. Always makes a crop and can be sown on poor land that will not raise other grain. Makes an abundance of pasture and green feed and also a fine cover crop or orchards and berries.

Hanchean Spring Barley. Usually does best on light land but is grown nearly everywhere.

Fall Barley. Barley is being planted in the fall and has proven very productive. The acreage has increased several hundred percent the last year and farmers are well satisfied with the results.

Cheat Seed. Recleaned. This is used as a hay crop especially on wet lands and when cut and taken care of at the right time makes a good hay.

Canada Field Peas. Field peas are becoming more popular every year. They make a good hay; make a great hog feed and are used for silos. **Lb. postpaid, 20c; not postpaid, 1b. 10c; 100 lbs. market price.**

Tangier Field Peas. This is the variety that is recommended so highly by O. A. C. as suitable for this section. **Lb. 15c; postpaid, 25c; 25 lb lots at 10c per lb. not postpaid. Write for quantity prices.**

VETCHES

Oregon Vetch (Common Vetch). One of the best forage plants grown on the Pacific Coast. It furnishes an abundance of green, makes a fine hay used for silos, pasture, and is unexcelled as a cover crop. **Price, per 100 lbs. \$7.00.**

Hungarian Vetch. This is proving a wonderful vetch; it seems to be adapted for land too heavy and wet for common vetch; is aphid proof; seems to stand more freezing than other vetches and is very productive. Can be used for all purposes that common vetch is used for with the assurance of making a crop when other vetches are a failure. **Price, per 100 lbs. \$7.00.**

Sand or Hairy Vetch. This thrives on poor, arid, sandy soil, but will grow anywhere. Is a winter vetch and should be planted in fall when to be cut for crop or seed. Can be seeded in spring for pasture. **10 lbs. postpaid, \$2.00; 100 lbs., by freight or express collect, \$15.00.**

Vetch and Oats. This is a mixture prepared for hay and is the usual mixture sown in this valley. Consists of recleaned grey winter oats and Oregon vetch. **Write for prices.**

SPRAY MATERIAL

We carry the largest stock of the most reliable spray materials in the city. You will find that our prices are the lowest that can be made on first class goods. You do not want to use anything but the best as it is money thrown away to use poor spray material. Spare the Spray and Spoil the Fruit. Never before has it been so necessary to protect fruit and vegetables crop against the ravages of insects and fungous diseases. This applies to commercial plantations and to the small orchard or garden. The question as to whether spraying pays has been answered. The real problem is one of improving sprays and their methods of application.

S W. Spray Oil, or Spray Mulsion. For Scale, Thrip, etc. From experiments we have made the past ten years, we find that for Scale on Fruit trees, there is no spray that has the killing effect of the oil spray. Should be applied as a dormant spray for this purpose. Spray-Oil, so far has been the only remedy for thrips; should be used with Black Leaf 40 and applied as soon as the thrip shows. Do not delay as the damage is done within a day or so and crop ruined. 5 gal. can, \$2.50; 50 gal. bbl. \$15.00.

S W. Lime Dry Sulfur. This is taking the place of the old Lime-Sulphur Solution as it has all the advantages and none of the disadvantages of this spray. A 100 lb. drum makes as much spray as a 600 lb. bbls. of the old spray. From tests made the last few years, it has surpassed all other sulphur sprays in various tests. Used for San Jose Scale, Apple Scab, Peach Curl Leaf, Brown Rot, Pear Psylla, Leaf Blister, Mite, etc. Lb. 30c; 5 lbs. \$1.15; 10 lbs. \$2.00; 25 lbs. \$3.25; 50 lbs. \$5.50; 100 lbs. market price.

Lime Sulphur Solution. We carry the well known and very reliable Dependable Brand of Lime-Sulphur Solution manufactured by G. Stolz Co. They have manufactured this well known brand for many years and it has proven very satisfactory. We carry stock at all times and have a very convenient place to load it. We sell at factory price. Price, 50 gallon barrel, \$9.00 Allowance of \$1.00 for barrel when returned.

S W. Arsenate of Lead, Dry Powdered. This has supplanted the paste form and is now used in all sections of the U. S. Much more convenient to use, only takes half as much, much more easy to mix, does not freeze, always good, no matter how old. Arsenic and Lead thoroughly combined, eliminating danger from burning. Cannot be sent by mail. Write for prices.

S W. Fungi Bordo Spray, Dry Powdered. The most convenient of Bordo Spray. Easy to handle and mixes readily. Now sold at prices that are cheaper than you can afford to buy the materials and make it. Cannot be sent by mail. Lb. 35c; 5 lbs. \$1.25; 25 lbs. \$4.50.

Black Leaf 40, Nicotine Sulphate. Guaranteed to contain 40% nicotine. When used according to directions it neither burns nor stains fruit or foliage. Used as a fruit spray for thrip and Aphis, as a Hop spray, and as a Sheep Dip. Also used on Garden truck, Onions, etc. Cannot be sent by mail. Oz. 35c; ¼lb. \$1.25; 2 lbs. \$3.50; 10 lbs. \$13.50.

Whale Oil Soap. An excellent summer wash for Aphis, etc. Lb. 20c; 100 lbs. market price.
